GUIDELINES FOR NURSING AND MIDWIFERY STUDENTS
OPTIONAL PLACEMENTS

An Optional Placement can be arranged to enable Nursing and Midwifery students studying with Plymouth University to gain practice experience in other healthcare provider settings at the end of their final year. An Optional Placement is an exciting opportunity for final year Nursing and Midwifery students to plan and organise a short period of learning in an area they have not been able to access during their course, or in an area where employment has been sought.

The aim is to:

1. Broaden student’s knowledge and experience of health care delivery in the context of their current status as a student.

2. Enhance student’s knowledge and understanding of a particular service or organisation in the context of pre-registration learning.

Nursing and Midwifery students (from any programme or field) can apply to undertake an Optional Placement during the last three weeks of their third year if the following criteria have been fulfilled:

- Students have successfully completed all year 1 and year 2 theory and practice and have provisionally passed all practice learning outcomes for year 3.

- Students who have passed all theory components OR have been referred in the theory component of ONE module ONLY will be able to undertake their Optional Placement choice.

- Nursing students can demonstrate they have not had in excess of 10 days sickness absence in total from practice at the time of their application.

- Midwifery students will not be able to attend an Optional Placement if significant practice hours are outstanding at the time of their application. This will be further reviewed prior to placement. This will normally be the equivalent of 10 days, which need to be made up prior to completion of the programme.

- Midwifery students must achieve their EU requirements prior to undertaking an Optional Placement.

- Students have discussed their Optional Placement choice with, and received the support of, their Personal Tutor with written supporting evidence.
An Optional Placement will be **organised and wholly funded** by the student and must be arranged in close liaison with their Personal Tutor and the Programme Lead. When calculating costs the student must consider accommodation, travel and all daily living costs. The student is responsible for monitoring that arrangements for their Optional Placement are progressing.

Prior to accepting and undertaking an Optional Placement students must ensure that:

- **A Workplace Agreement has been put in place with the provider.** This will be confirmed by nursingandmidwiferyplacements@plymouth.ac.uk

  OR

- **Midwifery only - An honorary contract entitling the student to undertake practice has been put in place by the provider and received by Programme Administration.**

**Application Deadline:**
Students should make the initial contact with the placement area with whom they wish to undertake an Optional Placement. The request will need to be made **during your final year** prior to commencement of the placement as shown below.

**By the end of:-**
- **September Cohorts** April
- **February cohorts** August

**How to Apply**
Students will need to evidence that the proposal has been discussed and agreed by their Personal Tutor and should include detailed information relating to their proposed learning outcomes. Supporting information should also demonstrate learning aims and a rationale for the Optional Placement choice. Once completed the application should be sent to nursingandmidwiferyplacements@plymouth.ac.uk (see flowchart).

Students will receive provisional notification via Nursingandmidwiferyplacements@plymouth.ac.uk within four weeks of receipt of their application, that they may proceed with their Optional Placement, subject to final confirmation from the respective Award Assessment Board.
