WELCOME!

This year an unprecedented number of local, national and international employers are travelling to Plymouth to meet you! They’re here to talk to as many students and graduates as possible and pass on their knowledge and experience of careers in their sector.

We hope that you enjoy the fair and make some great contacts.

Steve Gaskin
Head of Careers & Employability

THIS YEAR’S FAIR IS A GREAT OPPORTUNITY FOR YOU TO:

- Get ideas and information on what you can do with your degree.
- Meet over 50 major international, national and local employers, who will be recruiting for graduate vacancies, placements and internships.
- Meet different types of recruiters face-to-face, find out what type of individual they are looking to recruit and the criteria you may need to meet.
- Gain information and advice that may not be available on employers’ websites.
- Find out about options after graduation e.g. jobs, postgraduate study, starting your own business or time-out opportunities.
- Pick up information, tips and feedback from our Careers & Employability team.
- If you want to make the most of this great opportunity, why not have a look at our Accelerate Programme of workshops, videos and webinars at mycareer.plymouth.ac.uk.

TOP TIPS FOR THE DAY

- Remember organisations are always on the lookout for potential candidates.
- Research the organisations who are attending and visit their websites and social media.
- Prepare the questions that you want to ask. Aim to be remembered as the person who asked interesting and engaging questions!
- Don’t just consider the obvious big companies, remember all companies employ a wide range of staff. The more open minded you are, the more opportunities you will discover.
- Take copies of your CV to leave with employers. This will show that you are professional and prepared.
- Drop into the Careers & Employability Hub to pick up our new Career Hacks booklet on CVs, or to ask for feedback on whether your CV is up to scratch.
- Dress to impress; you never get a second chance to make a first impression!

SCAN-IN TO WIN!

Bring your student card along to the Science & Engineering Careers Fair and have it scanned by one of our Student Ambassadors or Careers & Employability staff to be entered into our prize draw for your chance to win one of the following great prizes:

- 1st prize – Amazon Echo Dot
- 2nd prize – Amazon Fire TV Stick
- Runners-up prizes – 3 x £20 Amazon.co.uk gift cards

TERMS AND CONDITIONS

1) Only one entry per person – duplicate card numbers will be removed.
2) Prizes are subject to change. For up-to-date information please visit https://www.plymouth.ac.uk/whats-on/scieng-careers-fair-2018
3) 5 student numbers will be drawn at random and winners will be notified no later than Friday 23rd November 2018.
WHAT KIND OF QUESTIONS SHOULD I ASK?

Your questions should depend on what's appropriate to the employer, the research you have done and what you want to get out of your discussion with them. Everyone's questions will therefore be different but here are a few examples to get you started:

- What particular skills are you looking for?
- What's the best thing about working for this company?
- What type of person fits in with your company?
- What is your normal selection process?
- How many stages are there? (such as assessment centres, interviews, tests)
- What motivated you to work for this company?
- What are the key deadlines for applying?

PLACEMENT EXAMPLES:

- Does your organisation recruit placement students?
- What experience would make a placement application stand out?
- Is placement experience valued in a graduate application?
- Where and when do you advertise your placement vacancies?

GRADUATE EXAMPLES:

- What training opportunities are available?
- How many graduates are recruited each year?
- What’s happened to the graduates you recruited last year?
- What are they doing now?

MAKE AN IMPRESSION!

NETWORKING EVENINGS

Join us for a fun evening of networking and dinner where you can meet with professionals relating to your degree background or the sector you wish to work in. With support from the Careers & Employability Service, you will have the chance to make contacts and build your confidence. This year we are holding the following networking evenings:

**Business Networking Evening**
- Thursday 8 November 2018
- 5pm – 8pm, Rolle Marquee
- The event is open to all students, to find out more and book: mycareer.plymouth.ac.uk

**Arts & Humanities Networking Evening**
- Thursday 7th March 2019
- 5pm – 8pm, Crosspoint, Roland Levinsky Building
- The event is open to all students, to find out more and book: mycareer.plymouth.ac.uk

**Science & Engineering Networking Evening**
- Thursday 28th March 2019
- 5pm – 8pm, Rolle Marquee
- The event is open to all students, to find out more and book: mycareer.plymouth.ac.uk

BABCOCK INTERNATIONAL GROUP - MARINE SECTOR

Babcock is the UK’s leading engineering support services organisation and employs more than 34,000 people around the world. It’s our people that make us great. When we’re tackling complex projects, we need employees who can rise to the challenge and help us deliver innovative engineering solutions. We invest in the right people for the job and so we offer apprenticeships and roles for everyone from students to graduates to fully-qualified professionals. We believe in creating a working environment based on dignity and respect, bringing together individuals from many different backgrounds to give us fresh perspectives and new ideas.

Find us on Facebook: Babcock Future Talent
Do you recruit international students? No, due to security clearances we cannot accept non-UK citizens for our roles

BAM NUTTALL

BAM Nuttall is part of the Royal BAM Group, one of the largest civil engineering and construction companies in Europe, with wide range of activities across the world. Within the UK, BAM Nuttall operates as a Civil Engineering contractor and can offer employment opportunities across all the main sectors of road, rail, marine, bridges, tunnels, water treatment, energy and land remediation. Graduate opportunities are available for those who have chosen a career in Civil Engineering, Geotechnical Engineering and Quantity Surveying.

Do you recruit international students? No, unfortunately we cannot provide sponsorship for visas

AECOM

AECOM is a global network of experts working with clients, communities and colleagues to develop and implement innovative solutions to the world’s most complex challenges. Delivering clean water and energy. Building iconic skyscrapers. Planning new cities. Restoring damaged environments. Connecting people and economies with roads, bridges, tunnels and transit systems. Designing parks where children play. Helping governments maintain stability and security. AECOM connect expertise across services, markets, and geographies to deliver transformative outcomes. Worldwide, AECOM design, build, finance, operate and manage projects and programs that unlock opportunities, protect our environment and improve people’s lives.

CHESS DYNAMICS LTD
Chess Dynamics Ltd is a medium sized UK company that provides sophisticated optical surveillance, communications and stabilised radar platforms and systems for land, maritime and off-shore applications. Our product based systems are ideally suited for tasks such as; search and rescue operations, protection of naval vessels, critical national infrastructure, military bases and vehicles, offering leading capability to modern military and homeland defence organisations.

EGS (INTERNATIONAL) LTD
EGS International Ltd is part of a leading international group of companies with offices in Europe, the Americas, Asia and Australia. EGS provide global specialist multi-disciplinary marine survey support, and deliver solutions to Offshore Renewable Energy, Nautical Charting, Oil and Gas, Telecommunications and Marine Infrastructure market sectors. EGS will give you the opportunity to work on a wide variety of exciting and challenging projects, which will allow you to expand your expertise and build your experience.

DAWNUS CONSTRUCTION LTD
Dawnus is a leading civil engineering and construction company with over 900 employees. The company currently operates across the UK and overseas. Established in 2001, Dawnus has grown from £2 million turnover in 2002 to circa £250 million, making it one of the fastest growing construction companies in the UK. At Dawnus, we are committed to providing training and career development for all our employees to provide job satisfaction, to contribute to the success of the company, and to maintain the high standards of our projects.

FDM GROUP
At FDM we believe in employing enthusiastic, talented people who are driven to succeed. Our consultants thrive in challenging roles and are trained to make a difference on client sites from day one. FDM is an international professional services provider with a focus on IT. FDM’s Careers Programme provides a tailored blend of specialist development. We transform talented university graduates, ex-forces personnel and returners to work into professional IT and business consultants.

FUGRO
We are the world’s leading, independent provider of geo-intelligence and asset integrity solutions for large constructions, infrastructure and natural resources. We provide the technical data and information required to design, construct and maintain structures and infrastructure in a safe, reliable and efficient manner. Our vision is to contribute to a safe and liveable world. This is critical to the sustainable development of natural resources and sustainable construction and operation of large facilities and infrastructure.

GARDLINE LTD
Gardline provides a comprehensive range of marine services, including geophysical, hydrographic, geotechnical, geochemoical, environmental, and oceanographic surveys, as well as consultancy and desk top studies. These services are delivered to across industry sectors with an interest in the marine environment, including oil and gas operators, EPIC contractors, renewable energy companies, governments and public bodies, environmental consultants and telecommunications companies.

GRADCRACKER
Gradcracker is the UK’s careers website for STEM students. We have more STEM employers, work placements and graduate roles than any other careers website, with over 200 leading employers offering thousands of opportunities at any one time.

RITTAL-CSM

Rittal-CSM was established in 1981, and the Factory in Plymouth was set up in 1986. We manufacture the latest and most advanced system enclosures for both the IT and Industrial/Engineering markets. We make a wide range of enclosures which are suitable for the toughest ambient conditions and ideal for a factory of the future. As well as designing and engineering OEM’s (Original Equipment Manufacturer), we produce several standard enclosures such as our TS8 and EL Line.

ROCKWELL COLLINS AEROSPACE

UTC Aerospace Systems is one of the world’s largest suppliers of technologically advanced aerospace and defence products. We design, manufacture and service systems and components and provide integrated solutions for commercial, regional, business and military aircraft, helicopters and other platforms. At the Plymouth location we design and manufacture products for control, navigation and guidance for surface and air applications in the global aerospace and defence markets. Our world leading products include the innovative MEMS based IMUs and the digital terrain reference navigation system, TERPROM®. Our growth plan includes development and extension of our current technologies into civil aircraft applications.

Do you recruit international students?
No, due to security clearances we cannot accept non-UK citizens for our roles

ROYAL NAVY

Because our world-class kit is only as good as the engineers keeping it in top working order, world-class training comes as standard whichever level you join at. It means you can tailor your career to meet your goals and ambitions. You could be working with industry leaders to develop new components, or gaining expert knowledge of nuclear power. No matter if you choose to specialise in marine, air or weapons, you’ll be at the leading edge of engineering, on some of the most sophisticated equipment in existence. Each day brings with it a fresh challenge, which is why all our engineers have the knowhow to find simple solutions to complex problems, fast.

THE OR SOCIETY
What size plane should B.A. buy? How much should the Government spend on policing? Where should Thompson send their holiday reps? These are just some of the questions you could help answer with a career in Operational Research (O.R.). In a nutshell, O.R. is the discipline of applying advanced analytical methods to help make better decisions. It uses techniques such as mathematical modelling to analyse complex situations, make more effective decisions and build more productive systems. The OR Society is the professional membership body of the O.R. community.
