

ABC: Developing blended learning at UoP

ABC (Arena, Blended, Connected) curriculum design, created by UCL Digital Education, is a process by which **module teams** work together to create a visual 'storyboard' outlining the type and sequence of learning activities (both online and offline) required to meet module learning outcomes. This can help to move learning that would normally take place in a classroom into an online environment. At Plymouth, a digitalised ABC methodology has been developed to support blended and online teaching. If you would like to engage with the digital ABC then please [click here](#) for instructions and resources. Once you have engaged with the process you can choose to attend a [drop-in](#) with professional services staff to support your developing ideas.

If you have any questions about ABC please contact educational.development@plymouth.ac.uk.
