

Does a physiotherapy programme using interactive exercise equipment improve balance in children with cerebral palsy

Who: I am Rachel Rapson and I am inviting children and young people with cerebral palsy, aged 4-18 years to take part in my study.

You need to be able to walk more than 5 steps, without holding on in order to take part.

What: You would do a physiotherapy programme three times per week for 10 weeks, either using an interactive trainer or doing your usual physiotherapy.

You might also be asked to take part in an interview.

Where: The study is taking place at Children's Physiotherapy Centres across Devon and Cornwall

When: You can take part from May 2020 - May 2021.

Please contact me if you're interested in taking part.
