

BMBS Programme Textbook List for New Students (2021/22)

We are often asked by students: “...which textbooks should I buy?” There are many different medical textbooks that are suitable for your early years and, as you progress, other texts will also become important. You are not expected to purchase every title below, and we would encourage you to try them before you buy!

- Copies of all these books and other electronic resources will be available to you via the School’s “Life Science Resource Centre” (LSRC) and both University and NHS medical libraries.
- We also asked our current Yr1-3 medical student reps for their recommended books. Their top 6 books are indicated by “***” in the list below.
- Additionally, special purchase offers may occasionally be available from publisher stands at the Freshers’ events when you arrive.
- These texts will not be required for the Foundation Year programme, however, you may wish to peruse these in preparation for progression to stage 1 of the BMBS programme.

Dr Nick Toms

Director of Medical Science Learning

- Cell & Molecular Biology. Lippincott’s Illustrated review by Nalini Chandar & Susan Viselli, 2nd Edition (2018) Lippincott Williams & Wilkins, ISBN-13: 978-1975106232, £32.00
- Cellular & Molecular Immunology by Abul K. Abbas, Andrew H. Lichtman & Shiv Pillai, 9th Edition (2017), New 10th edition due June 2021. Elsevier, ISBN-13: 978-0323479783, £53- recommended for Yr2-5
