Diagnostic Radiography Refresher Learning

The Diagnostic Radiography academic staff have prepared an online course covering the following topics to help you prepare to commence study with the University of Plymouth:

- Talking Science
- Biological Chemistry
- Principles of Physics
- Fundamentals of Cell Biology
- Principles of Physiology: Cardiovascular and Respiratory Systems

Completion of this course is not mandatory and the outcome of any quizzes you complete will not affect your offer to study with us. We hope that you will find this a useful tool for refreshing your scientific knowledge, particularly if you have been out of education for a little while, or if your recent learning has been affected by the coronavirus pandemic.

In order to access this resource, please use the following instructions:

1. Visit the following webpage:
<https://open.plymouth.ac.uk/course/view.php?id=131>
2. Select 'Create New Account' and follow steps to register your information
3. Verify your email address using the email you will receive. Please check your junk folder if this does not appear in your inbox. Click 'continue' on the webpage when you have done this
4. In the 'Search for courses' box, enter 'Peninsula Medical School: Introduction to Diagnostic Radiography'
5. This should show a course of the same name
6. When prompted to enter an Enrolment Key, enter '**diagrad**'
