

# Approved Calculators

Updated: 26<sup>th</sup> January 2012

If your calculator appears in this approved list then you must take it to your school office where they will place an approved sticker on the operating face of the calculator.

If your calculator does **not** appear on this list you should take it to your school office to check if it is permitted. If it is **not** permitted you will have to purchase a calculator which conforms to this list and have your new calculator approved by your school office as described above.

If your calculator appears in the [prohibited list](#) - which you can view by scrolling down to the bottom of this page - then it will not be permitted in exams where non programmable calculators are required. You will have to purchase another calculator which conforms to the approved list and take it to the school office for an approved sticker to be issued.

## Prohibited Calculators

A list of calculators prohibited for use in examinations.

If your calculator appears in this prohibited list then it will not be permitted in exams where non programmable calculators are required. You will have to purchase another calculator which conforms to the approved list and take it to your school office for an approved sticker to be issued.
