

Task: what I currently do with written comments from lecturers on my work

Decide what you normally do when you get your work back with written feedback from tutors and lecturers. Tick one or more of the columns as appropriate – not least the ‘I won’t do this in future’ and ‘I’ll do this in future’ column where you realize that it would be helpful to adjust your technique regarding using written feedback towards making sure that your studies will be successful.

<i>What I do with written feedback comments on my work</i>	<i>This is exactly what I do</i>	<i>This is sometimes what I do</i>	<i>This is not what I do!</i>	<i>I won't do this in future</i>	<i>I'll do this in future</i>
1. I look first at the mark or grade I've received.					
2. I'm influenced a lot by the mark or grade I receive when I look at the feedback.					
3. If the mark is better than I expected, I analyse the feedback carefully to work out why my mark was better.					
4. If the mark was worse than I expected, I analyse the feedback carefully to find out why my mark wasn't so good.					
5. If I don't like the lecturer very much, I don't take much notice of the feedback.					
6. I take careful note of positive comments, and find out what earned them, so I can use this feedback to make future work better.					
7. I get upset by critical comments, and sometimes feel bad about such feedback.					
8. I take careful note of the causes of critical feedback, and work out how exactly I can avoid these sorts of criticism in future work.					
9. I make systematic comparisons between feedback comments I receive from different lecturers, and work out which are general trends regarding my work.					
10. I share the feedback comments I receive with fellow students, and learn more about the comments they received on their work.					
11. I file my marked work carefully, so that I can return to the feedback comments later and reflect on them.					
12. I make an action plan based on the feedback I've received, and keep this handy to continue to use in future work.
