ADVANCED CRITICAL CARE PRACTITIONER
WITH PLYMOUTH UNIVERSITY
ADVANCED CRITICAL CARE PRACTITIONER

Become an advanced critical care practitioner in three years with our masters-level programme. You will increase your practical and theoretical knowledge whilst advancing your career potential, positioning yourself at the leading edge of critical healthcare.

HIGHLIGHTS

- Integrated approach to learning, involving clinical practice, critical thinking and key skills.
- Supervised by Consultant Intensivists in the clinical area.
- Research-informed teaching delivered by a dynamic team with extensive experience in the delivery of masters-level modules.
- Based on the national curriculum and syllabus for advanced critical care practitioners published by the Faculty of Intensive Care Medicine.

MODULES

Years 1 and 2: PgDip Advanced Critical Care Practitioner (full time)

- Advancing research knowledge in practice 1
- Core skills for advanced critical care practitioners 1
- Core skills for advanced critical care practitioners 2
- Non-medical prescribing

Year 3: MSc Advanced Critical Care Practitioner (part time)

- Advancing research knowledge in practice 2
- Substantive professional project

PROGRAMME AIMS

To support you to:

- become a competent advanced critical care practitioner in two years, with an option to complete your masters-level qualification in the third year
- focus on the development of skills integral to delivering high-quality patient-led service in a critical care environment
- gain the confidence and knowledge to undertake complex procedures, manage the care of the critically ill patient and be responsible for leading teams within the critical care arena
- apply evidence-based best practice to improve patient care and enhance your practice
- cultivate a precise and meticulous work ethic, delivering an effective, safe and efficient service to patients, whilst working both autonomously and as part of a multi-professional team.

CAREER OPPORTUNITIES

- Gain associate membership status of the Faculty of Intensive Care Medicine.
- Participate in service delivery innovation, with high-level patient interaction and decision making.
- Progress to doctoral study.
