NEONATAL NURSING WITH PLYMOUTH UNIVERSITY

ADVANCED NEONATAL NURSE PRACTITIONER

Plymouth Hospitals NHS Trust
This innovative new programme, developed in collaboration with Plymouth Hospitals NHS Trust, will empower the neonatal nurse to develop as an Advanced Practitioner. The contemporary focus inspires efficiency, effectiveness and quality of practice to positively impact upon neonatal care.

**HIGHLIGHTS**

- Contemporary course design with innovative curriculum supporting research informed excellence and sustainability.
- Innovative and inspirational teaching by subject experts via a blended learning approach incorporating inter-professional learning opportunities.
- Part time programme offering flexible delivery and exit points to support a learner centred approach.
- Includes the independent and supplementary prescribing module and routine examination of the newborn competencies.

**PROGRAMME AIMS**

This programme will enable you to advance your knowledge and skills by:

- Developing a contemporary approach to health and social care through advancing and utilising knowledge and skills in professional practice.
- Ensuring professional practice is underpinned by a focus on excellence and sustainability by developing a critical, analytical and creative approach.
- Critically reviewing trends in theory, practice and management relating to neonatal practice.
- Equipping individuals for lead roles in management and clinical neonatal practice.
- Promote an understanding of the philosophy and procedures involved in research and use of evidence.

**MODULES**

- Advancing research knowledge in practice 1
- Holistic neonatal assessment and clinical management
- Advancing practice in context
- Advanced neonatal nursing practice
- Independent and supplementary prescribing
- Advancing research knowledge in practice 2
- Substantive professional project

**CAREER OPPORTUNITIES**

- Advanced Practitioner roles in clinical, teaching and management settings
- Lead and innovate clinical professional practice
- Progress to doctoral study
