ADVANCED PROFESSIONAL PRACTICE
(CLINICAL PRACTITIONER)

The MSc Advanced Professional Practice (Clinical Practitioner) is a clinically-focused specialist pathway designed to prepare and support nurses, midwives and allied health professionals in their clinical careers. You will develop your understanding of the underpinning principles of clinical assessment and examination to inform safe and effective clinical decision making, ensuring that you have the knowledge and skills required to work in any sector of the health service.

HIGHLIGHTS

• Assessment is embedded in practice, allowing you to build your assignments around your own learning needs in your specific practice area.
• Our programme is delivered and taught by a team still currently in clinical practice, with extensive experience in teaching at masters level across a wide and diverse range of health and social care environments.
• You will have the benefit of an interprofessional study environment, allowing rich peer learning opportunities.

MODULES

Core modules

• Advancing practice in context
• Advanced assessment for clinical practice
• Advancing research knowledge in practice 1
• Managing clinical complexity
• Advancing research knowledge in practice 2
• Substantive professional project

Optional modules (not exhaustive)

• End of life care
• Contemporary approaches to public health
• Leadership and innovation

PROGRAMME AIMS

To support you to:

• Gain a deeper understanding of advanced clinical practice which is embedded in the four pillars of advanced practice.
• Develop cognitive and clinical skills in consultation, clinical examination and interpretation of diagnostic data.
• Gain expertise in complex decision making in the absence of complete data by developing competence, autonomy and professional accountability.
• Synthesise and implement your knowledge into practice.

CAREER OPPORTUNITIES

• To work as an advanced clinical practitioner across any clinical setting from primary care to the emergency department.
• Take on advanced practitioner roles in teaching and management.
• Lead and innovate clinical professional practice.
• Progress to doctoral study.
