MSc ADVANCED PROFESSIONAL PRACTICE WITH PLYMOUTH UNIVERSITY

NEUROLOGICAL REHABILITATION
MSc/PgDip/PgCert

Advanced Professional Practice in
NEUROLOGICAL REHABILITATION

This pathway will enable you to advance your neurological rehabilitation practice. The pathophysiology of neurological conditions, their clinical assessment and management will be explored and you will apply knowledge and skills to your individual area. You will gain critical skills in using evidence, developing services and research and applying this to your area of neurological practice.

This pathway is applicable to all members of the interprofessional team.

HIGHLIGHTS

- This pathway allows you to work flexibly, through combining short study blocks and online learning. You can choose modules aligned to your area of practice and CPD needs.
- You will be supported by a team with international and national research profiles in neurological rehabilitation, who will help you take the next step in your career.
- You can enhance your clinical skills in our Human Movement and Function Laboratory.

MODULES INCLUDE:

- Neurological rehabilitation: sensorimotor disorders.
- Injection therapy (Botulinum Toxin).
- Pathomechanics and rehabilitation of gait and balance.
- Rehabilitation cognition, perception and behaviour.
- Management of long-term conditions.

“...The pathway appealed to me because it was a very good balance of things that would inform my day to day clinical practice, as well as inform service redesign – doing the MSc has really impacted positively on my career progression...”

Emma Cork, Stroke therapy lead

CAREER OPPORTUNITIES

- Take on advanced practitioner roles in clinical work, teaching and management.
- Develop your knowledge and clinical skills and your ability to lead and innovate professional practice.
- Progress to doctoral study.
