MSc/PgDip/PgCert

Advanced Professional Practice in Paediatric Dietetics

Offered in partnership with the British Dietetic Association (BDA) this progressive pathway for Registered Dietitians allows flexibility for differing levels of experience, whether in the acute or community setting. The pathway will allow you to develop a deep understanding of paediatric dietetics and the additional skills and expertise necessary for clinical assessment and management as an advanced practitioner. You will gain critical skills in the appraisal of literature, research and developing services, for application to your own professional practice.

HIGHLIGHTS

- This pathway is studied at specialist locations in Plymouth and across the UK using blended learning with short study blocks supplemented by technology enhanced learning.
- You can learn in a team with international research profiles in paediatric dietetics who will help you take the next step in your career.

CAREER OPPORTUNITIES

- Take on advanced practitioner roles in clinical work, teaching and management.
- Develop your knowledge and clinical skills and your ability to lead and innovate professional practice.
- Progress to doctoral study.

MODULE CHOICES AND LOCATIONS INCLUDE:

BDA Partnership Paediatric Dietetics modules are delivered at clinical sites across the UK, including London, Manchester, Birmingham, Bristol, Liverpool and Glasgow.

Modules include:

- Nutrition and dietetics in infancy and childhood.
- Nutrition and dietetics in common paediatric disorders.
- Clinical dietetics for infants and children.
- Dietetic management of inherited metabolic disorders.
- Neonatal nutrition.
- Core modules delivered at Plymouth University with short intensive blocks and blended learning.
